

Copy and save Images from the internet

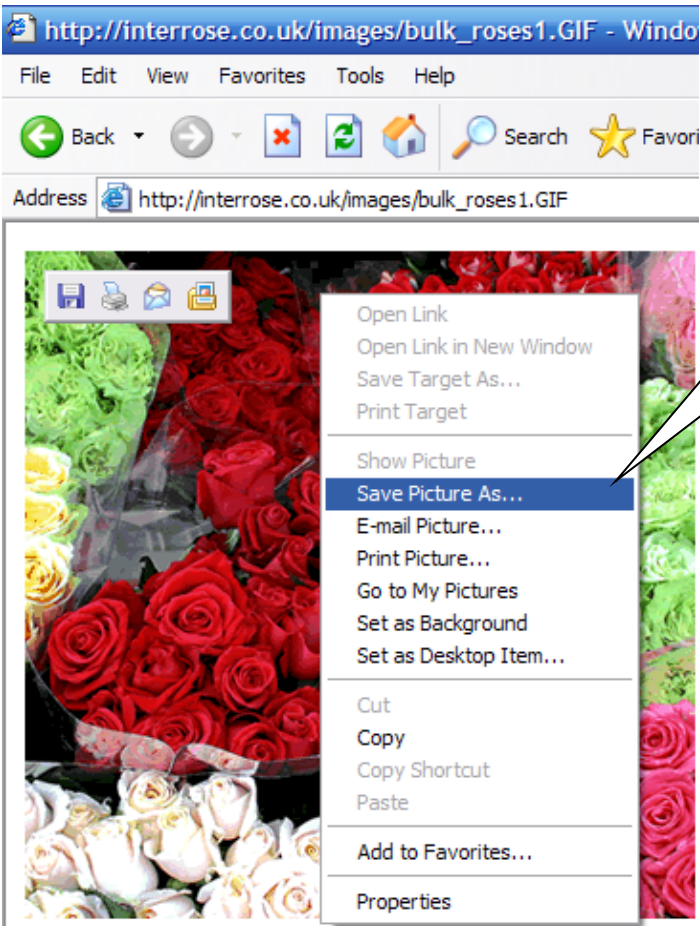

1. Log onto the Internet
2. You can copy images from any of the search engines Google, yahoo, dog pile etc
3. We will use Google add google.co.uk to the address bar on your Internet explorer page.

Lots of images with the topic name I asked for showed up. – Click on the desired image

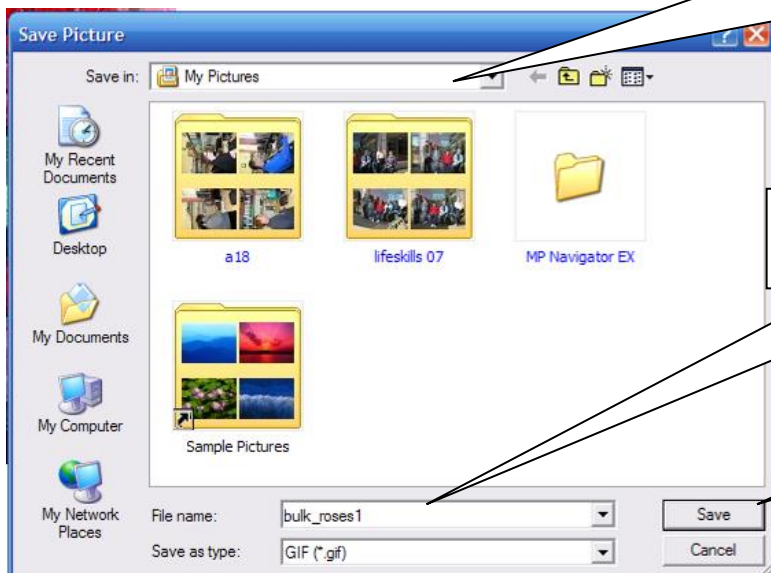

I clicked on the second image – Click on SEE FULL SIZE IMAGE

Right Click on Image and Choose SAVE PICTURE AS

It should automatically save to your default My Pictures Folder...you can change this to another folder if you want to

Give the image a descriptive name

Click SAVE
