

## Word 2016 – Adding a word to the dictionary

When you use the spelling checker, it compares the words in your document with those in the tool's main dictionary. The main dictionary contains most common words, but it might not include proper names, technical terms, or acronyms. In addition, some words might be capitalized differently in the main dictionary than in your document. Adding such words or capitalization to a custom dictionary prevents the spelling checker from flagging them as mistakes.

**The word should now be added to the dictionary.**
